

IARC/ NCI Tumor Seminars

IARC, Lyon, France
Sasakawa Memorial Hall A & B

Wednesday 1st April

13:30-14:00	Christopher P. Wild, Stephen Chanock and Paul Brennan: Introductions and Presentation of the first draft of the 'difficult questions'
-------------	--

14:00-14:25 Ariana Znaor: Descriptive epidemiology and an overview of non-genetic factors for renal cancer

14:50-15:15 Mattias Johansson: Do circulating vitamins drive renal cancer incidence and survival?

Session 2: Molecular and genetic epidemiology of renal cancer (Moderator Chanock)

15:30-15:55 Tim Frayling: Genetics of obesity, diabetes and metabolic syndrome – are there clues for renal cancer?

15:55-16:20 Pär Stattin – Metabolic factors associated with renal cancer

16:20-16:45 Marston Linehan: Highly penetrant kidney cancer syndromes

16:45-17:10 Kate Nathanson: Clinical genetics and management of hereditary renal and adrenal cancer susceptibility syndromes

17:10-17:35 Mark Purdue: Common germline variation for renal cancer – results of large GWAS

17:35-18:00 Discussion Point: Can genetic and environmental factors contribute to screening for renal cancer

20:00 **Dinner at Restaurant Les Adrets**

Thursday 2nd April

8:45-9:00 Registration

Session 3: Genomics of renal cancer (Moderator Chanock)

09:00-09:25	Chad Creighton: Landscape of somatic alterations in kidney cancer – an integrated analysis
9:25-9:50	Su Kit Chew: Renal cancer evolution – accessing the time axis
9:50-10:15	Seishi Ogawa: TCEB1 mutated tumors, a novel entity of clear cell renal carcinomas
10:15-10:40	Ghislaine Scélo: Genomic signatures for environmental exposures – the CAGEKID study

10:40-11:00 Break and group photo

11:00-11:25	Ian Davis: Chromatin alterations in RCC
11:25-11:50	Roz Banks: Integrating proteomics with genomics – biomarker and therapeutic target discovery
11:50-12:15	Elizabeth J. Perlman: Genomics of pediatric renal tumors
12:15-12:45	Discussion of somatic alterations and tumor heterogeneity

12:45-14:00 Lunch

Session 4: Therapeutic Issues in renal cancer (Moderator Brennan)

14:00-14:25	Olivier Cussenot: Genomics and management of renal cancer: move in translation
14:25-14:50	David F. McDermott: Optimal targeting of the PD-1/PD-L1 Pathway in Metastatic RCC
14:50-15:15	Bernard Escudier: How to rationalize intermittent schedule and dose adaptation with VEGF inhibitors?
15:15-15:45	Discussion of therapeutic challenges

15:45-16:00 Break

16:00-18:30	Revise 'difficult questions' and frame the outline of the final document
-------------	--

Dinner
