This Handbook was made possible thanks to the generous funding by the Ministère de la Santé, de la Jeunesse et des Sports

International Agency for Research on Cancer

The International Agency for Research on Cancer (IARC) was established in 1965 by the World Health Assembly, as an independently financed organization within the framework of the World Health Organization. The headquarters of the Agency are in Lyon, France.

The Agency conducts a programme of research concentrating particularly on the epidemiology of cancer and the study of potential carcinogens in the human environment. Its field studies are supplemented by biological and chemical research carried out in the Agency's laboratories in Lyon and, through collaborative research agreements, in national research institutions in many countries. The Agency also conducts a programme for the education and training of personnel for cancer research.

The publications of the Agency contribute to the dissemination of authoritative information on different aspects of cancer research. Information about IARC publications, and how to order them, is available via the Internet at: <http://www.iarc.fr/>.

This publication represents the views and opinions of an IARC Working Group on Methods for Evaluating Tobacco Control Policies which met in Lyon, France, 12 - 19 March 2007.

Funding

The IARC Tobacco Control Handbook Volume 12 was funded by the Ministère de la Santé, de la Jeunesse et des Sports, France.
