## A Checklist for Dad - A children's book about cancer

IARC is pleased to announce the publication of the children's book [A Checklist for Dad](#), written by Dr Tricia L. Larose, a former IARC postdoctoral scientist

Our thoughts are with everyone around the world during the COVID-19 pandemic crisis, especially health-care workers. It appears that people with pre-existing noncommunicable diseases (NCDs), including cancer, are at higher risk of becoming severely ill, according to the World Health Organization (source: [WHO Information Note on COVID-19 and NCDs](#)).

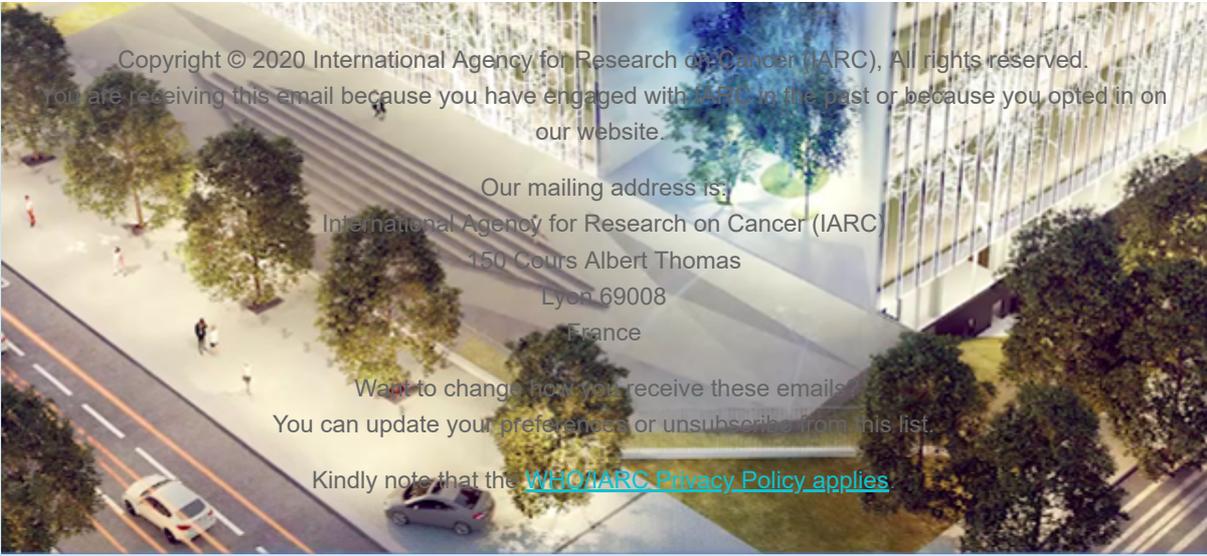

IARC's priority is conducting cancer prevention research to save lives. Our team remains mobilized throughout this period, and is working with determination towards a world free of preventable cancers.

We wish you and your loved ones all the very best during this time.

Let's prevent cancer, together!
