World Cancer Report live event

In line with its mission to support the Global Strategy to Accelerate the Elimination of Cervical Cancer, by the World Health Organization and partners, IARC is broadcasting the **first webinar** of the **World Cancer Report Webinar Series** on human papillomavirus (HPV) vaccination. This webinar will describe the impact of **HPV vaccination** in Australia, which implemented one of the earliest and most successful vaccination programmes. This will be followed by an up-to-date overview of global progress in the implementation of HPV vaccination, with a focus on challenges in low- and middle-income countries. Limited spaces are available to attend the webinar live and interact with the experts. Register now!

World Cancer Report Updates

With the support of the **European Society for Medical Oncology (ESMO)**, IARC is launching the *World Cancer Report Updates* learning platform. Inspired by the *World Cancer Report Highlights*, the platform will progressively develop as a living resource providing engaging and thought-provoking content on the latest developments in cancer research. This online platform dedicated to **cancer research for cancer prevention** is freely accessible to all.

A Webinar Series will complement the large variety of educational resources based on selected content of *World Cancer Report*.

Register now in a few clicks through the IARC Learning portal and stay informed about the development of these new *World Cancer Report Updates* and many more resources!

Cancer research for cancer prevention

World Cancer Report: Cancer Research for Cancer Prevention is a multidisciplinary publication, with leading international scientists as authors and reviewers. It has more than 60 chapters, which describe multiple aspects of cancer prevention and the research that underpins prevention, focusing on research activity during the past 5 years.

The publication provides wide-ranging insights into cancer prevention based on the known causes of cancer, factors that determine how cancer develops, and the behaviour of different tumour types, and presents a broad scope of interventions to reduce the cancer burden from a global perspective, including addressing inequalities that affect cancer prevention.
